

# Rules for Addition Bingo

## (One More Than, Two More Than, Zero Facts)

### Version #1 (sums on the BINGO cards)

- Use the number cards (0-9) and the 0, 1, 2 spinner and the 1, 2 spinner.
- Turn over one of the number cards and spin the spinner (on each turn, each player can choose which spinner to spin).
- Each player marks that sum on their game board (it may be on the board more than one time – if so, you can only mark one).
- The first player to get 5 in a row (across, down, or diagonally) is the winner.

### Version #2 (addition problems on the BINGO cards)

- Use the number cards (0-10).
- Turn over one card – this is the sum.
- Each player must choose an addition problem with that sum (there may be more than one problem) and then mark it on their game board.
- The first player to get 5 in a row (across, down, or diagonally) is the winner.
